Uses

Dry Cow All-Trace helps farmers manage the trace element status of their herd over critical periods of the production cycle. The boluses lie in the reticulum and dissolve from a constant surface area thus providing a continuous and regular supply of nutrients to the animal. Dry Cow All-Trace boluses have an active life of 120 days.

Dosage and Administration

Administer two boluses per animal.

Dry Cow All-Trace can be given to the following groups of livestock:

Dairy cows at drying off

8-10 weeks pre-calving in beef suckler cows

Always use the recommended Agrimin bolus applicator. A twin bolus applicator is available which saves time and makes administration much easier

Contra-indications, warnings etc

There is no need to administer additional copper, cobalt, iodine or selenium during the active life of Dry Cow All-Trace (120 days)
