Uses

smAll-Trace for calves helps farmers manage the trace element status of their herd over critical periods of the production cycle. The boluses lie in the reticulum and dissolve from a constant surface area thus providing a continuous and regular supply of nutrients to the animal. smAll-Trace for calves boluses have an active life of 180 days.

Dosage and Administration

Administer two boluses per animal.

smAll-Trace for calves can be given to the following groups of livestock:

Dairy calves from 6 weeks
Suckler calves from 6 weeks
Spring born calves at turnout

Always use the recommended Agrimin bolus applicator. A twin bolus applicator is available which saves time and makes administration much easier

Contra-indications, warnings etc
